

Intelligent Addressable Fire Alarm

Indiana School District Chooses Electrical Equipment Company for its Fire Alarm Needs

Outstanding Installation and Service

ELECTRICAL EQUIPMENT COMPANY, INC. works closely with school districts to provide information on national codes and requirements pertaining to regular testing and maintenance of their fire alarm systems. Our NICET-Certified technicians and engineers are among the best in the industry

Once we finish installing and certifying a fire alarm system, we train and educate customers on the operation of the system and give them the opportunity to arrange future testing and re-certification, which must be performed on a regular basis as required by law. These service agreements are convenient especially to customers with large systems, as regular appointments can be made months in advance.

Project Profile

Cardinal and Delaware Trail Elementary Schools in Brownsburg, Indiana opened in the Fall of 2001 with a sophisticated Intelligent Addressable Fire Alarm system monitoring both facilities.

The system includes custom graphic annunciators in main entryways, a digital alarm communicator, a large 4' x 3' graphic annunciator, and over 325 addressable devices throughout the complex.

Cardinal & Delaware Trail Elementary Schools—Brownsburg, Indiana

A District-Wide Solution

The Brownsburg Community Schools have chosen Electrical Equipment Company to provide fire alarm testing and service throughout the entire school district. Our extensive inventory of replacement parts assures customers that if a problem should occur with any of their systems, a wait for replacement on those parts would take only a matter of hours rather than weeks. We offer twenty-four hour emergency service and are always on-call to respond to emergency situations in under four hours.

These services coupled with our years of experience and industry certification makes Electrical Equipment Company the service provider of choice for school districts throughout Indiana.
