Providing State-of-the-Art Sound Systems for A Wide Range of Applications

## **Because Every Room is Different**

ELECTRICAL EQUIPMENT COMPANY, INC. has been in the business of designing, installing and configuring professional audio systems for over twenty years. Our expertise and experience enables us to provide top-quality installation of custom audio systems for a wide variety of applications. During the design phase of a project, we use high-tech tools and instruments to test the sound properties of your room before any equipment is recommended. Once this data is gathered, we can custom design a system specifically for the room, and then fine tune each component based on how the system will be used.

Whether you need a sound system for voice or music, in a gymnasium, auditorium, cafeteria or meeting room, Electrical Equipment Company can provide a great sounding system.

## **Project Profile**

The Eastern Howard Performing Arts Center in Greentown Indiana hosts an annual series of performances by nationally known comedians, musicians and touring acts. This intimate theater provides many of the features often found in some of the finest venues in the country, including a large stage capable of supporting touring musicals, ballet performances, or large symphony orchestras. The auditorium also comes complete with abundant backstage areas, dressing rooms, and state-of-the-art lighting and sound systems.

Eastern Howard Performing Arts Center—Greentown, Indiana

Three loudspeaker clusters, comprising of JBL Professional large format horns, high frequency drivers and low frequency speakers deliver exceptional coverage and clarity of sound throughout the auditorium. Additional speakers are located in the backstage areas and sound room to allow monitoring of events on stage. All speakers are powered by nine Crest Audio Power Processing amplifiers which provide exceptional sonic accuracy, low power consumption and comprehensive speaker protection.

Additional equipment includes a 40-channel mixing console, an in-house production intercom, assistive listening system, wireless microphone system, and a touch-screen control system. The sound room also contains a professional quality cassette recorder, compact disc player, and a 24-bit digital audio tape recorder for high quality recording of events.
